Cabka takes over KS Kunststofftechnik

- Cabka strengthens and expands its Eco-Products business and its production capacity
- Product portfolios and production sites complement one another well

KS Kunststofftechnik GmbH & Co. KG is now part of the Cabka company group. In future, KS Kunststofftechnik will operate under the new name Cabka GmbH & Co. KG Eifel. The news was announced by the CEOs of both companies, Gat Ramon (Cabka) and Rudolf Knecht (KS). All technical products made of recycled plastics manufactured at the Bad Münstereifel location, such as construction fence posts, safety base plates, lane dividers as well as lawn paving elements, will be fully integrated into the Cabka product portfolio.

With the takeover, Cabka, well-known for its innovative plastic pallets and boxes, strengthens and expands its Eco-Products business. Eco-Products are sustainable products that are manufactured 100 percent from recycled plastics. They are used in numerous areas such as the construction industry, road and traffic safety as well as for garden design and landscaping.

Moreover, the group's plastic recycling business will grow and the production capacity will increase with the new location in Bad Münstereifel.

Customers will benefit from the takeover also in geographical terms: Closer links and lower transport costs will further enhance the company's ability to serve the Western European area in particular.

Cabka has taken on all KS employees, bringing its total staff to approximately 500 people.
